

energy CARIBBEAN

ENERGY Caribbean is the first publication of its type ever devoted exclusively to the energy industry in the Caribbean. Energy developments in the region have been largely overlooked by international publications in the past, despite the fact that one Caribbean country, Trinidad and Tobago, leads the world in gas-based industrial growth.

As energy impacts on all other businesses, *ENERGY Caribbean* is of interest to all players in the regional economy. It is the key forum for news about the industry throughout the Caribbean.

"ENERGY Caribbean is the first publication of its type ever devoted

exclusively to the energy industry in the Caribbean."
